SUMMARY

Frontend Developer with **1.5+ years of experience** building production websites, admin tools and mobile apps with React.js, Next.js and React Native. Shipped **4 public websites, 2 iOS and Android apps and 6 admin, CRM and service panels** for the NEET Navigator ecosystem, covering counselling data, payments and student dashboards. Strong in responsive UI, performance, SEO and real-time features (WebRTC, Socket.IO), and in wiring REST APIs, Razorpay and Google and Apple sign-in to clean, fast interfaces.

PROFESSIONAL EXPERIENCE

Frontend Developer | NEET Navigator, Delhi — Jan 2026 - Present

- Built the frontends of **4 public Next.js websites** (NEET Navigator, NEET PG Navigator, MBBS Lighthouse, NEET Manobal) with **180+ routes**: college directories, cut-off and fee data, rank predictors, dashboards and a credits wallet.
- Developed **2 cross-platform mobile apps** (GMC or NOT, NEET PG Navigator) with React Native and Expo Router, including Google and Apple sign-in, push notifications, shareable result cards and over-the-air updates.
- Built **6 internal panels** (WhatsApp CRM, admin, mentor, super-admin, support and reports; **145+ screens**) with Next.js and Redux Toolkit, with role-based access and data-heavy tables, forms and dashboards.
- Integrated REST APIs, **Razorpay checkout** and Google OAuth across products; built loading, error and empty states for the payment and login flows.
- Implemented SEO foundations (dynamic metadata, JSON-LD, sitemaps) and performance work (SSR, lazy loading, font and image preloading) to improve discoverability and load speed.
- Built motion-rich landing pages with Framer Motion, GSAP and WebGL while keeping them smooth on mobile devices.

Frontend Developer | Nickicon Information Technology Pvt. Ltd. — Apr 2025 - Dec 2025

- Built responsive interfaces in React.js, Redux, HTML, CSS and Bootstrap for a **live coding platform handling thousands of concurrent users**, managing complex shared state with Redux.
- Integrated **real-time live streaming and chat** using WebRTC and Socket.IO.
- Converted UI/UX designs into **pixel-perfect, mobile-responsive** screens and verified cross-browser compatibility.
- Worked with backend engineers to integrate RESTful APIs, testing and validating endpoints with Postman.

SELECTED PROJECTS

PG Notices Desk (open source): live feed of NEET PG counselling notices, monitoring 23 official sources every 10 minutes with Python and GitHub Actions; published as a static page with an RSS feed. Python, GitHub Actions, GitHub Pages

Developer Portfolio (mahesh-dev-zeta.vercel.app): scroll-driven animated site with live case studies, structured data, sitemap and llms.txt for search and AI engines. Next.js 16, React 19, Vercel

SKILLS

Frontend	React.js, Next.js (App Router), JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, GSAP, WebGL
Mobile	React Native, Expo, Expo Router, EAS Build, push notifications, Google and Apple sign-in
State and Data	Redux Toolkit, React Hooks and Context, react-hook-form, zod, Axios, REST API integration
Real-time	WebRTC, Socket.IO, live streaming and chat
SEO and Speed	Server-side rendering, dynamic metadata, JSON-LD structured data, sitemaps, Core Web Vitals, lazy loading
Tools	Git, GitHub, Postman, Playwright, Docker, GitHub Actions, Vercel; working knowledge of Node.js, Express, MongoDB, PostgreSQL

EDUCATION AND CERTIFICATION

Bachelor of Computer Applications (BCA), Indira Gandhi National Open University (IGNOU) — Jun 2022 - Present

MERN Full Stack Development, Ducat India (Certification) — Jan 2023 - Mar 2024
